EXA**Pad**
EXA**Pad** mini

One scanner, endless possibilities

An innovative design with exceptional image quality, the ExaPad allows you to diagnose quickly and accurately.

Lightweight and robust, the scanner moves with you from practice to yard with ease.

Select your preferred probe and move seamlessly between musculoskeletal, abdominal, cardiac or reproductive imaging.

The streamlined interface allows for easy annotation of images and the ability to perform detailed measurements and cardiac calculations.

Patient files and reports are all adapted for veterinary use.

Echo Touch
Touchscreen interface, where only necessary functions are displayed on the screen, making adjustments to functionality fast and efficient.

Echo Voice
Giving you voice control over the main functions, Echo Voice allows you to work with complete autonomy, even whilst working at a distance from the device.

Echo Pad
With EchoPad installed on your iPAD, you have access to a second command board for your ExaPad to pilot your scanner remotely. Personalised presets, saved on your iPad, can be used on the ExaPad.
